

# GreenSmart 2™ Gas Fireplace Inserts

fireplace**x**tordinair™  
REDISCOVER FIRE

## North America's Most Popular Gas Insert Line!

Fireplace Xtrordinair proudly produces our high-quality line of gas fireplace inserts that compliment a broad range of architectural styles and heating needs at our manufacturing plant in Mukilteo, Washington. We utilize the finest materials, and subject them to vigorous testing standards to make fireplace inserts that stand up to the rigors of time. These inserts are the best money can buy. In fact one of every three gas inserts sold is one of ours! We are proud to be both passionate about the science and the art of making beautiful fire for your home.

## Turn Your Fireplace Into An Efficient Heat Source

Our GreenSmart™ fireplace inserts are designed to transform virtually any metal or masonry fireplace into an efficient source of heat. Traditional open fireplaces can have efficiency ratings up to 15% and depending on the condition can actually draw the heat out of your home for a net heat loss! Our inserts are "Heater Rated" and may be used as a primary heat source or for zonal heating.

## Zone Heating

Unlike a gas furnace that ducts heat to all rooms of your home, you can use your insert for zone heating and just heat the room(s) you are using. Our GreenSmart™ remote helps you save on your heating bill by maintaining your desired temperature by automatically modulating the flame rather than burning fuel when not needed.

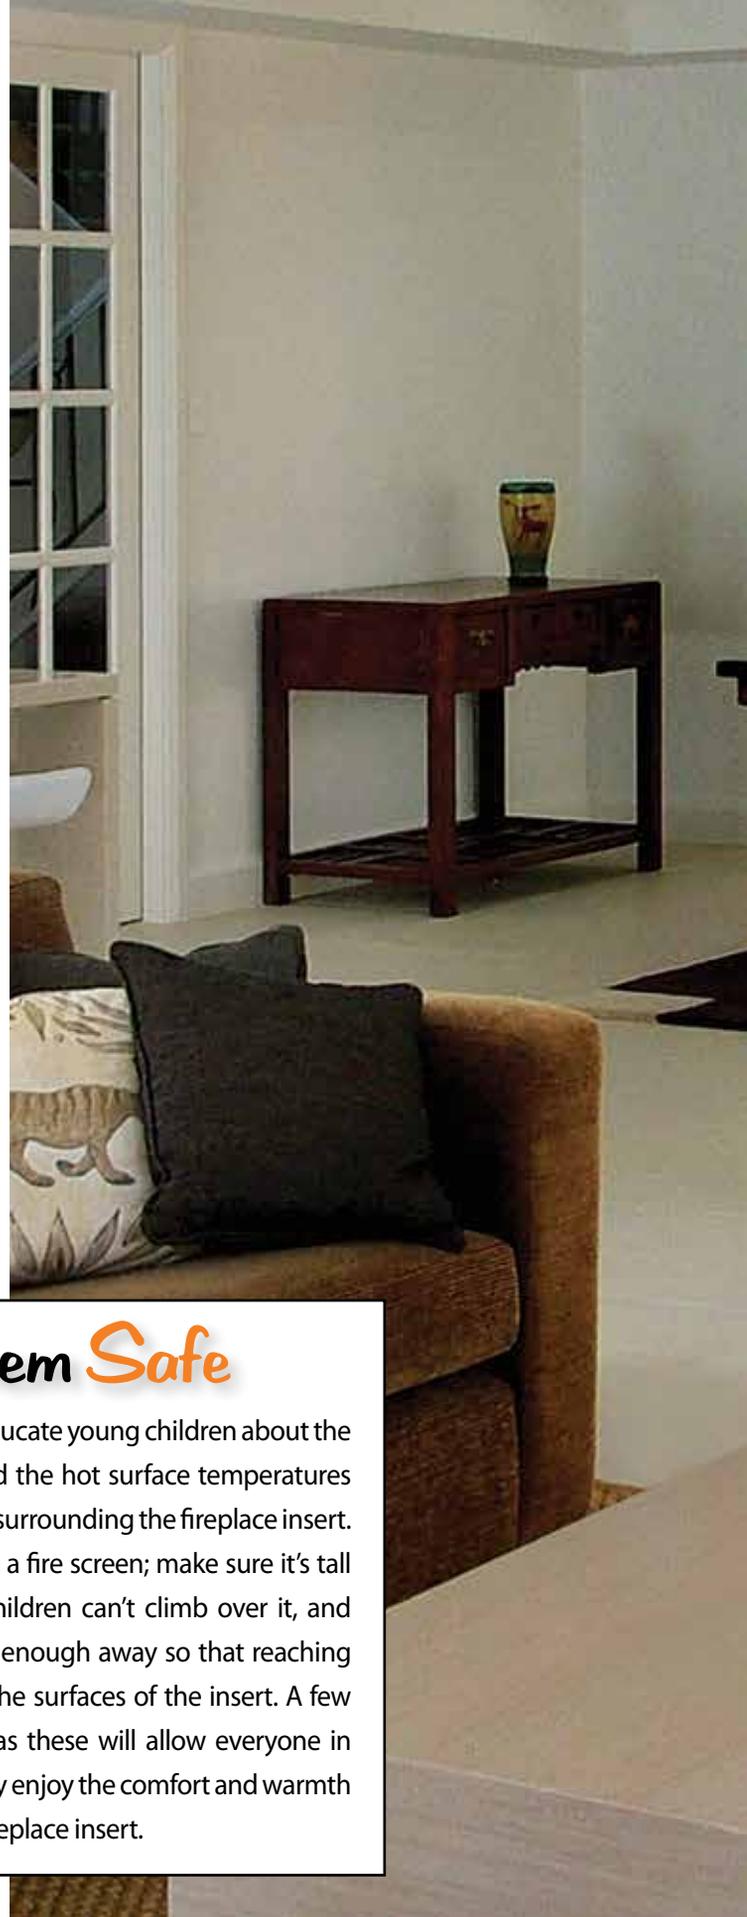

## Direct Vent

Our gas inserts are all “direct vent,” meaning that they pull combustion air from the outside of the house and not your living space. For indoor air quality, safety and performance both combustion air and exhaust gases pass through your existing chimney via a direct vent kit.

## Choose The Right Model For You

You have five models of gas inserts to choose from depending on your heating needs, fireplace size, and taste. Four that feature convection heating and one traditional hearth face model.

Consult with your authorized Fireplace Xtrordinair dealer to verify which insert best suits your home heating needs. Our dealers are trained, qualified professionals that can provide expert installation and service on your new gas insert.

## Keep them Warm, Keep them Safe

Take the time to educate young children about the dangers of fire and the hot surface temperatures of glass and metal surrounding the fireplace insert. Consider installing a fire screen; make sure it's tall enough so that children can't climb over it, and that it's placed far enough away so that reaching arms can't touch the surfaces of the insert. A few precautions such as these will allow everyone in your home to safely enjoy the comfort and warmth of your new gas fireplace insert.

*Model 33 DVI with the  
Universal Face, Fyre-Stone Kit  
and Stainless Steel Fireback*

## Quality and Beauty from the Inside Out!

### Personalize Your Fire

Our variety of beautiful face and interior options give your fireplace insert a custom appearance that not only updates the look of any room, but makes your fireplace look like it was designed that way from the beginning.

### Choose a Face

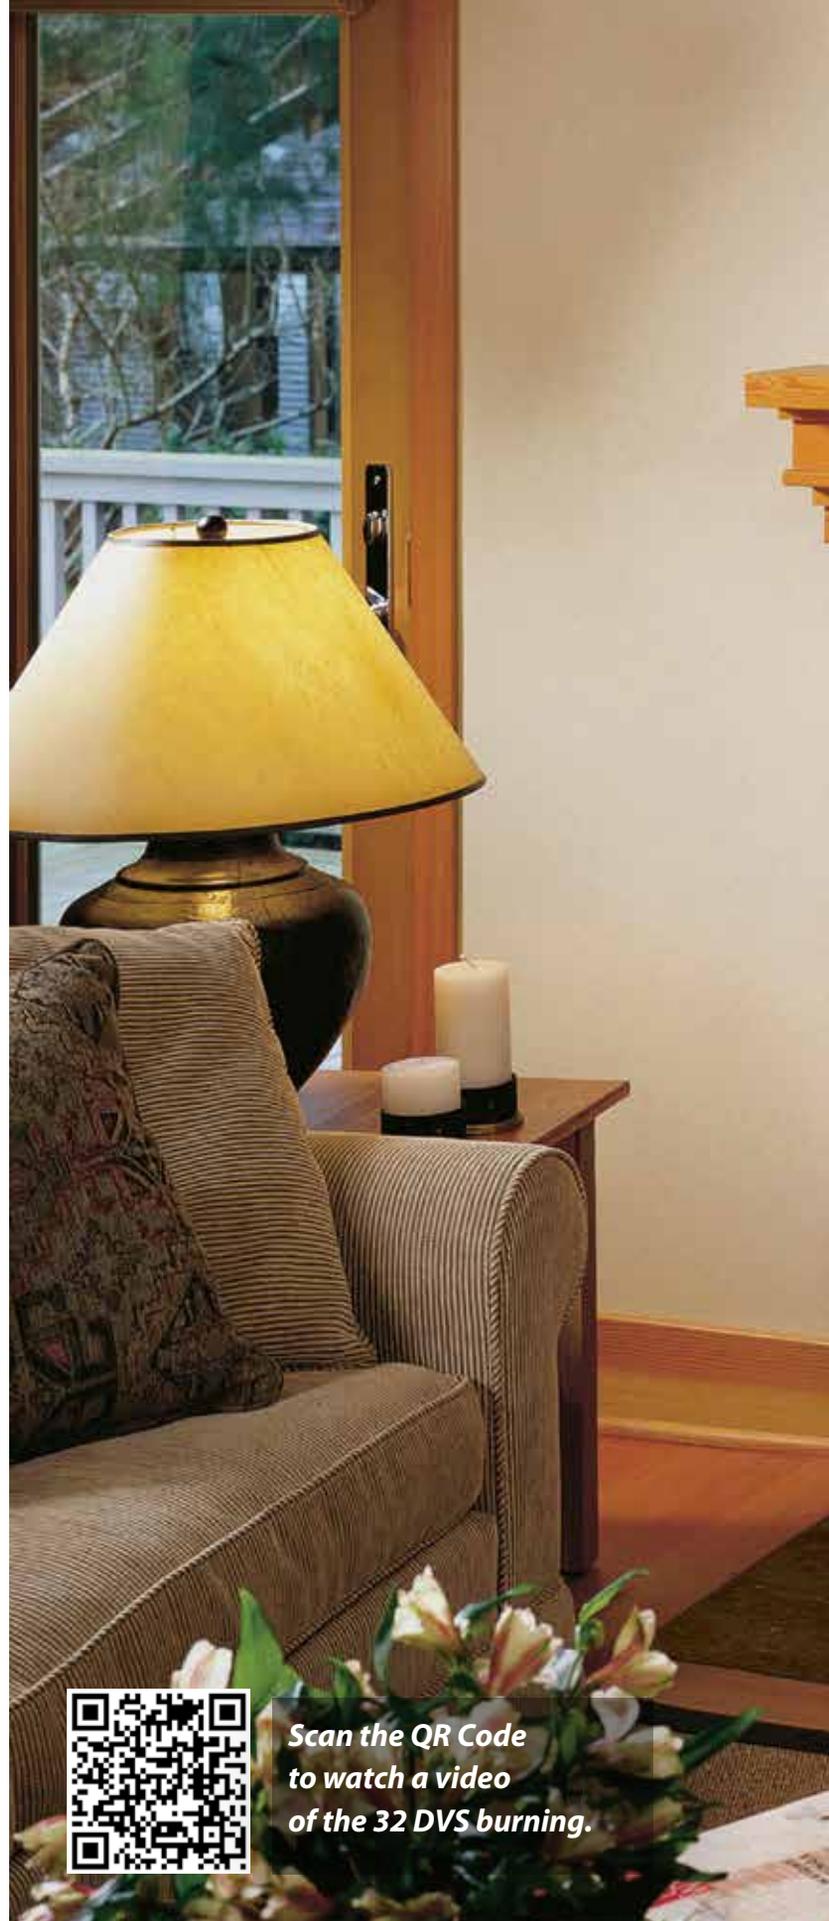

Fireplace Xtrordinair offers higher quality and more looks than any other company. You are sure to find one that fits your style.

### Choose Your Media

You are no longer limited to just one look inside your insert. Choose from our Award Winning Ember-Fyre™ Logs, Traditional Log, beautiful Driftwood Fire Art featuring sculpted wood that looks stunning whether the fire is on or off or the Fyre-Stone™ Rock Kit for a completely new look in fire.

### Choose an Interior Fireback

A fireback provides a dramatic backdrop for the fire, adds visual interest to the space. Pick a fireback that best complements your face and media selection.

*Model 32 DVS with Ember-Fyre logs,  
Bronze Patina Artisan Face, Handmade  
Brick Fireback and custom painted panels.*

*Model 34 DVL with Ember-Fyre logs,  
Black Painted Classic Arch Face,  
Herringbone Brick Fireback and  
Arched Panels.*

*Model 34 DVL with Ember-Fyre logs,  
Artisan Double Door with large  
backing plate, Artisan Accent and  
Herringbone Brick Fireback.*

## Full Convection Gas Fireplace Inserts

### Models 31DVI GSB2, 33 DVI GSB2

The DVI series is a manual system offering the same durable construction and large glass viewing area as the top selling GSR2 gas inserts. Both DVI inserts feature the GreenSmart Dancing-Fyre™ burner, standard convection fan and your choice of interior media and fireback options. For convenient hands-free operation you may upgrade to a wall thermostat or a standard thermostat remote control.

*Wall thermostat*

*Standard thermostat remote control*

### Models 32 DVS GSR2 and 34 DVL GSR2

The GSR2 performance series is our top selling insert line offering every feature and every convenience possible. This series offers full convection, built-in fans, accent lights, AND the GreenSmart Remote with the the highest efficiencies and the largest turndown ratio of any gas insert. The ultimate in comfort and convenience.

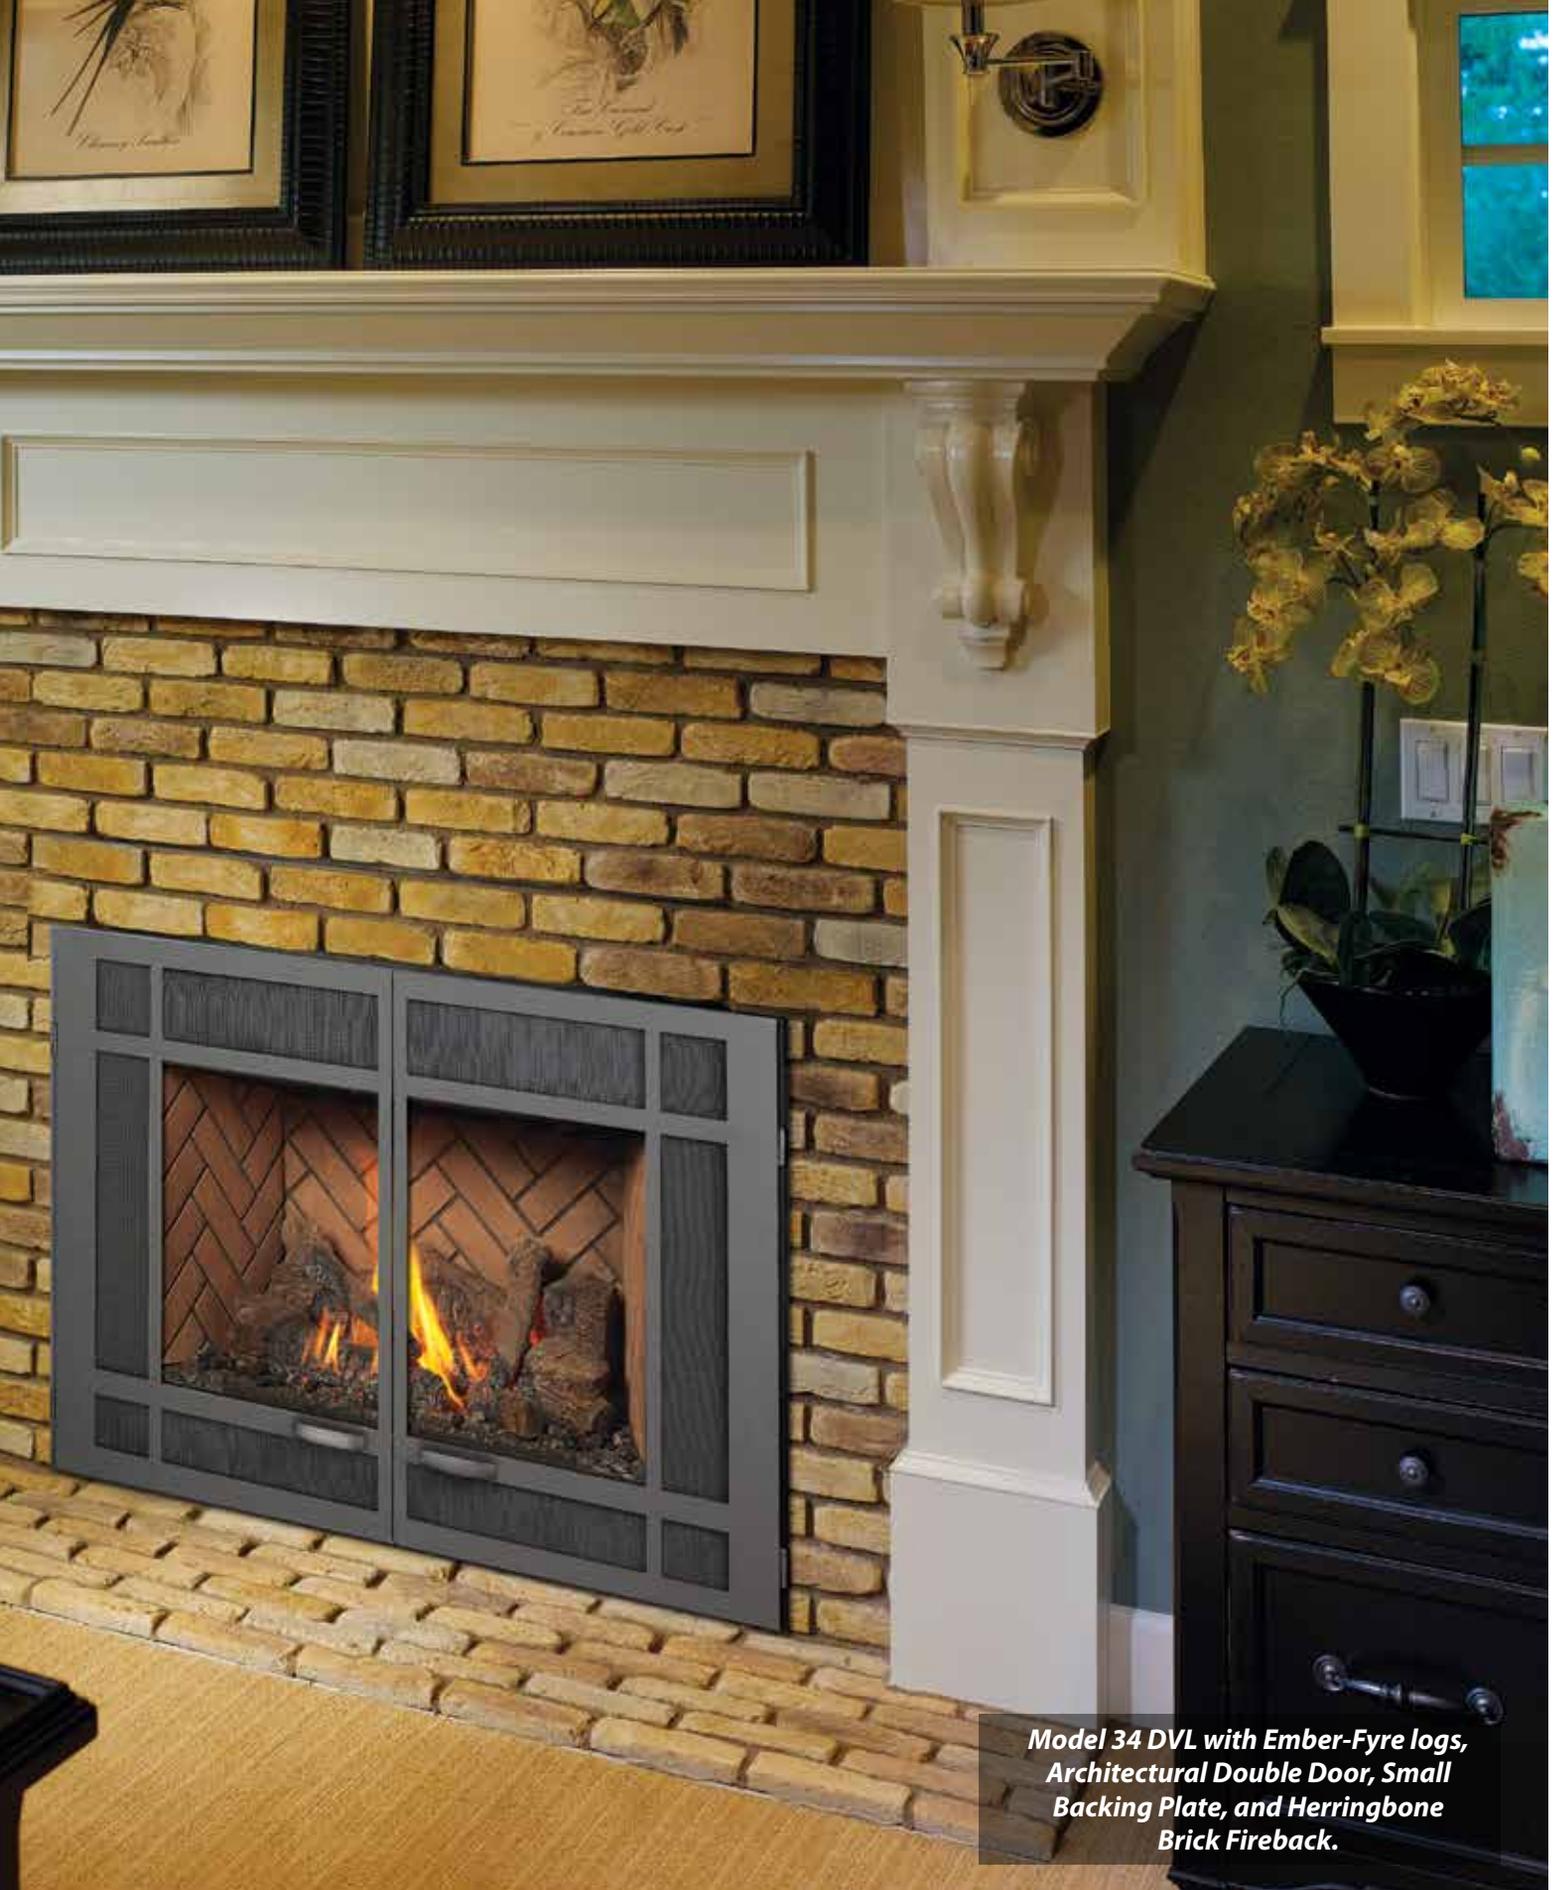

*GreenSmart 2 thermostat remote control*

These four models feature a full convection chamber with faces that complement your homes interior yet disguises the convection chamber that delivers the heat.

## Models 31DVI, 33 DVI, 32 DVS GSR2 & 34 DVL GSR2 Finish Options

### Media Options

Your interior media choice transforms the overall look of your insert allowing it to fit with any architectural style. Choose from the Ember-Fyre™ High Definition logs which comes standard with the Award Winning Ember-Fyre burner for the most realistic wood-like fire available. This option is available only in the 32 DVS GSR2 or 34 DVL GSR2 inserts. You also have the choice of the Traditional Logset giving you another log option available for all models. Or you may choose from the Fyre-Stone™ or Driftwood Fire Art™ which is completed with a glass floor available in platinum, bronze or cobalt blue colors.

*High Definition Ember-Fyre Log Set with  
(32 DVS/34 DVL Only)*

*Traditional Log Set with Dancing-Fyre  
(All Models)*

*Fyre-Stone Rock Kit with Glass Media  
(All Models)*

*Driftwood Fire Art with Glass Media  
(All Models)*

### Firebacks

Leave the interior basic black for a very simple contemporary look, or add a decorative fireback. Traditional firebacks come in a choice of Handmade Brick, Common Brick, and Herringbone Brick patterns. For a strikingly more contemporary look, choose the beautiful black enamel or stainless steel liner.

*Herringbone Brick shown with  
Traditional Log Set*

*Black Enamel Fireback shown with  
Driftwood Fire Art and Glass Media*

*Stainless Steel Fireback shown with  
Fyre-Stone Rock Kit and Glass Media*

## Finishing Your Fireplace Insert

Insert panels are used to close off the opening of your fireplace when installing a gas insert. Fireplace Xtrordinair offers a choice of five looks. Please see page 23 for panel dimension.

### 8" x 10" Arched Panel and Trim

This option offers the graceful arched upper panel, which adds a desirable element to many installations. To ensure coverage of the fireplace opening, consideration must be made to account for the radius of the top panel.

### Rectangular Panel and Trim

The Rectangular Panel System is available in three sizes and is the most versatile.

### Inside-Fit Panel

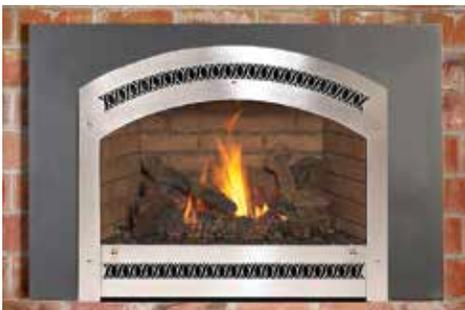

You can modify (cut-down) any of the standard rectangular panels to fit the inside opening of your fireplace.

### Lower Zero Clearance Panel and Trim

Designed to be used with Rectangular panel systems, this lower panel offers a finished appearance to your installation when the existing fireplace opening is elevated above the floor. This panel can be cut to size and will cover up to 7" below the insert.

Bottom Panel and Trim Only

### One Piece Panels

The one piece panel is flat, has no trim, no seams and does not require a hearth extension for a very clean look. This panel requires approximately 1" more depth, height and width to your fireplace opening for the insert to fit. See your Owner's Manual for details.

### Optional Insert Wiring Kit

If you do not want the fan power cord running across your hearth use our optional U.L. approved Fan Wiring Kit. This kit allows you to hard-wire the electrical connection within your existing fireplace for a safe and cord free installation. Available for all gas inserts.

### Go to the Fireplace Xtrordinair™ Website and Design Your Own Fireplace Insert

Customize the right insert for you. [www.fireplacex.com](http://www.fireplacex.com) has a wide selection of premium quality gas, wood and electric fireplaces and fireplace inserts – each custom-crafted with an eye for detail. But what's going to work in your house?

The Fireplace Xtrordinair Fire Designer can help you customize your insert with an easy and fun website that helps you choose the right insert for the right space and for the right look.

Print the specifications of the insert you've designed and take them into any of the more than 1,200 Fireplace Xtrordinair dealers worldwide for pricing, installation and more.

## 616 GSR2 Traditional Hearth Fireplace Insert

The 616 showcases a very large viewing area second to none. A traditional hearth look is achieved by having our ceramic glass go almost all the way to the bottom of the unit and hearth. The 616 GSR2 gas insert converts an existing masonry or metal fireplace into an efficient heater while preserving the charm of a traditional fireplace.

The standard twin 90 CFM fans (180 CFM total) moves air around the firebox and hidden heat exchange system. With a Shadowbox face the heated air is forced down in front of the ceramic glass, super heating the air as it moves into the living area. The Universal and Metropolitan faces have direct alignment of the convection chamber, allowing transfer of hot air directly into the living area.

This Extra Large insert fits into most fireplace openings, only measuring 24-1/4" high x 35" wide x 16.5" deep. Having the controls located laterally allows for an almost 20% increase in glass viewing area.

The 616 comes complete with fans, 3 accent lights (top and back), 3 stage burner and GreenSmart Remote. The GreenSmart Comfort Control allows the middle and front burner to operate independently of the rear burner for maximum flame turndown.

### Face Options

Personalize your fireplace by choosing one of four different designer faces. All faces come with safety screens.

*Universal Face*

*Metropolitan Face*

*Shadowbox Face - Black*

*Shadowbox Face - Bronze*

*Model 616 with the Shadowbox Face, Black Painted Fireback, Driftwood Fire Art and One-Piece Panel.*

*Scan the QR Code to watch a video of the 616 burning.*

## Media Options

The interior media easily transforms the overall appearance of the insert allowing it to fit a wide range of architectural styles. The Traditional Log Set comes with beautifully detailed logs and glowing embers. The Fyre-Stone Rock Kit and Driftwood Fire Art are equally stunning and also include glowing embers.

*Traditional Log Set*

*Driftwood Fire Art*

*Fyre-Stone Rock Kit*

## Fireback Options

Leave the interior basic black for a very simple contemporary look, or add a decorative fireback. When using the Fyre-Stone Rock Kit or Driftwood Fire Art in the 31 DVI or DVS models, you only have the option of the Black Enamel or Stainless Steel interiors.

*Standard Black Painted Fireback shown with Fyre-Stone kit*

*Straight Brick Fireback shown with Traditional Log Set*

*Herringbone Brick Fireback shown with Traditional Log Set*

*Handmade Brick Fireback shown with Traditional Log Set*

*Black Enamel Fireback shown with Driftwood Fire Art*

*Stainless Steel Fireback shown with Fyre-Stone Rock Kit*

## Single Piece Finish Panels

One piece panels are available for the 616 GSR2 and come in two sizes.

**30-1/2" H x 42" W**

**34" H x 44" W**

Custom panel sizes are available through your Fireplace Xtrordinair dealer.

## Insert Wiring Kit Option

If you do not want the fan power cord running across your hearth use our optional U.L. approved Fan Wiring Kit. This kit allows you to hard-wire the electrical connection within your existing fireplace for a safe and cord free installation. Available for all gas inserts.

**Model 616 with Bronze Shadowbox Face, Black Enamel Fireback, Fyre-Stone Set and One-Piece panel**

# GREEN 2 SMART™ TECHNOLOGY

The patent-pending GreenSmart 2™ System is the most innovative collection of components, controls and technology that when combined provides an elegant, smarter and greener way to heat your home. The deluxe 32 DVS and 34 DVL models include the GreenSmart 2 modulating remote control.

## GreenSmart 2 Manual System

A dashboard is located under the front of the 31 DVI and 33 DVI models, and is operated manually.

1. Convection Blower Rheostat Control: OFF and HIGH to LOW adjustments.
2. Variable Flame Control: This control adjusts flame and heat up and down.
3. Two Position Pilot Selection: Push up for continuous pilot and down for GreenSmart Pilot.
4. Comfort Control: Push UP for both burners and DOWN for front burner only.
5. Battery Back-Up: Automatically switches from AC to battery during power outages and back again when power is restored.
6. Main Burner Switch: This switch turns the burner ON/OFF.

## Drop Down Concealment Door

The control valve and wires are hidden by our concealment door on all models to provide an elegant, finished appearance. The concealment door conveniently opens and closes for easy access to the controls.

Closed

Open

## Highly Visible Dashboard

The manual controls of the 31 DVI and 33 DVI models are located on a black dashboard behind the concealment door. All controls are clearly labeled with white silk-screened lettering.

## Control Panel Lighting

On the 31 DVI and 33 DVI models when the concealment door is opened, control panel lighting is automatically turned on to make viewing controls on the dashboard easy in a low light environment in your home. LED lights are powered by a 9 volt battery for use even during power outages.

## Choice of Pilots

### Continuous Pilot (Standing) or GreenSmart Pilot (IPI)

This switch allows you to run all models in either Continuous Pilot mode or GreenSmart Pilot mode. A continuous pilot stays on all the time, ideal during cold weather when a draft is needed for safe, reliable operation. It also reduces condensation which can form on the glass when the appliance is first turned on. The GreenSmart Pilot mode uses an intermittent pilot (IPI) spark to light the pilot flame only when the unit calls for heat, therefore conserving energy when the appliance is not being operated. This system includes a battery back-up, ensuring proper ignition even during power outages.

## Comfort Control™

The Comfort Control, standard on all models, operates the split-flow burner system. Push the button to OFF and your Comfort Control will turn off the rear burner while leaving the front burner on for an attractive flame appearance when less heat is desired. This feature offers a turn-down ratio of up to 72 percent! Push the button to ON and the rear burner will light giving you maximum heat when you need it. This offers you the most beautiful fire and more heating flexibility than any other product. Another smarter, greener way to enjoy fire in your home.

Front Burner Only

Both Burners On

## Accent Lights

Accent Light(s) are a standard feature on the 32 DVS and 34 DVL gas inserts. This feature adds a warm glow to the interior of the firebox and can be used when the fire is on or off and is perfect as a night light or soft indirect light for the room. The Accent Light allows you the ability to use your fireplace 365 days a year. *Note: The DVS features rear accent lights only. The DVL features top and rear accent lights. Rear accent light feature is not available when using Driftwood or Stone Kit.*

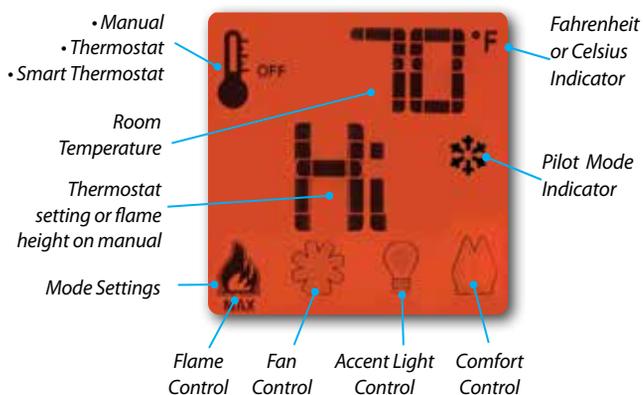

Accent Light Off

Accent Light On

## GreenSmart 2 Remote Control System

The GreenSmart 2™ remote offers the ultimate in features and convenience from any location within 25 feet of your appliance and includes a bracket for wall mounting the remote. There is no need to open the control panel to operate the unit. Standard with the 32 DVS and 34 DVL models. NOT AVAILABLE FOR 31 DVI GS2 and 33 DVI GS2 Inserts.

watch a video of how the GreenSmart 2™ remote works.

- **Manual Setting:** Fire ON/OFF and adjust flame height.
- **Thermostat** Thermostat control setting turns fire automatically ON and OFF to maintain set temperature.
- **“Smart” Thermostat** In “Smart” Thermostat mode the flame will modulate from low to high, or high to low until the set temperature is reached. This will conserve fuel usage and extend the viewing pleasure of the fire. If the room temperature exceeds the thermostat setting, the unit will shut off until heat is required again.. The most comfortable and efficient way to heat your home.

# Installing An Efficient Gas Fireplace Insert In Your Metal or Masonry Fireplace

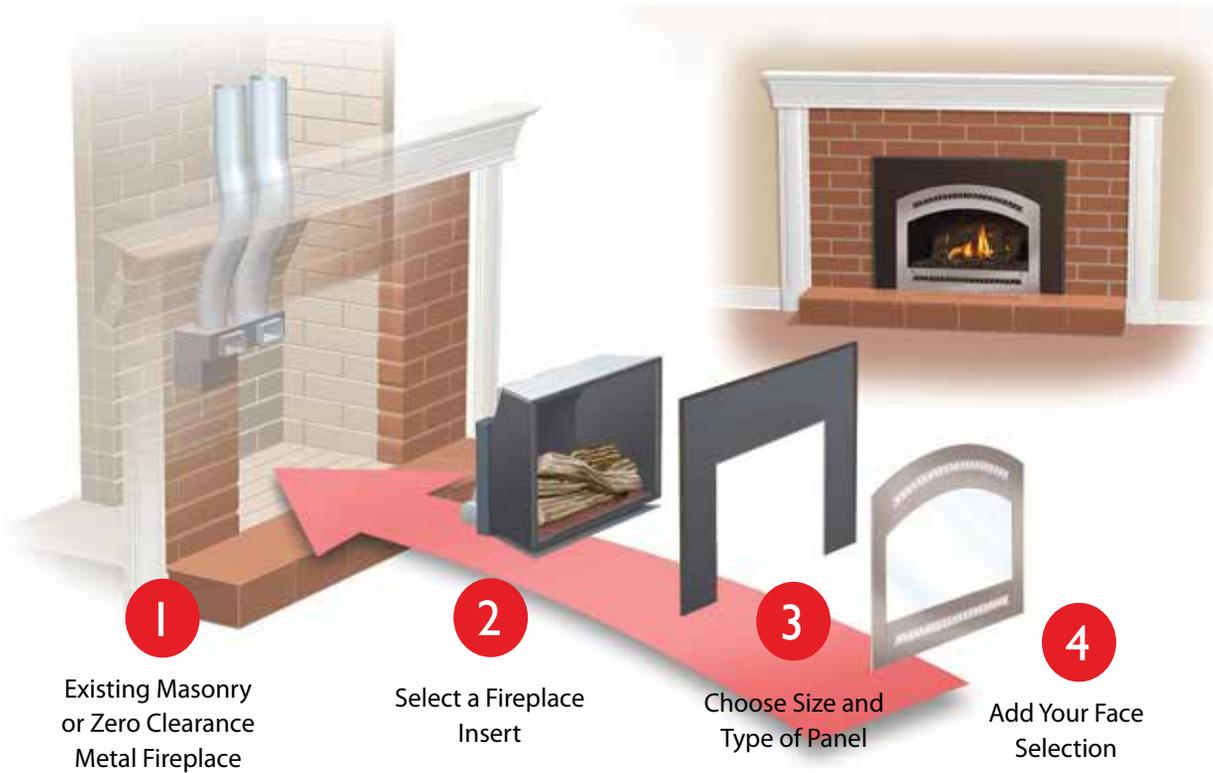

**1** The first step is determining whether you have a metal (zero clearance) or masonry fireplace and which insert will fit into your fireplace. Your Fireplace Xtrordinair Design Center Professional can help if you need it. They will also provide you with your new air intake system and exhaust vent liners. It is important that this work is done by a hearth professional.

Next determine which insert is best for your home based on size and your heating requirements. Again, your Design Center Professional can help.

**2** Model 31 DVI/32 DVS GSR2 - Heating Capacity: Up to 1,500 sq. ft., BTU Input: Up to 31,000 BTUs/Hr.  
Model 33 DVI/34 DVL GSR2 - Heating Capacity: Up to 2,000 sq. ft., BTU Input: Up to 40,000 BTUs/Hr.  
Model 616 GSR2 - Heating Capacity: Up to 2,000 sq. ft., BTU Input: Up to 39,000 BTUs/Hr.

**3** Choose the correct size and preferred style of insert panel.

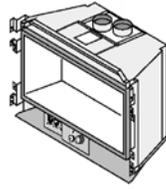

**4** Select a face design and optional firebrick and you are ready to enjoy your new efficient gas insert by Fireplace Xtrordinair! If you do not want the fan power cord running across your hearth, consider using the optional Fan Wiring Kit which allows you to hard wire the fan's electrical connection within your existing fireplace.

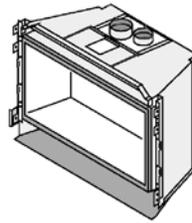

## Direct Vent Kit

Looking for a clean look to finish off the top of your chimney after your insert is installed? Fireplace Xtrordinair offers a decorative direct vent "Mission-Style" chimney cap and liner kit for your new gas insert.

Note: Improper installation of your gas appliance or failure to operate it in accordance to the guidelines detailed in the Owner's Manual may negate your warranty and endanger your home and family. Installation information is available on our website at [www.fireplacex.com](http://www.fireplacex.com).

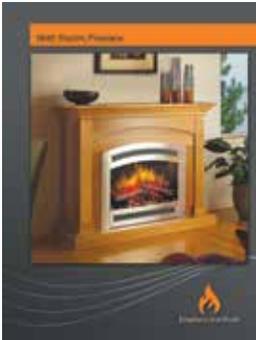

We recommend all Fireplace Xtrordinair appliances be installed and maintained on an annual basis by your Specialty Hearth Retailer.

## Warranty

Your Gas Fireplace Insert is backed by a network of Specialty Hearth Dealers and certified factory trained installers. Fireplace Xtrordinair warrants our products to be free from defects in material and workmanship for a period of 7 years from date of purchase. All parts, electronics, and labor are covered for a full 2 years. No other manufacturer's warranty can compare. **but you will have to pay a trip charge**

## Additional Fireplace Xtrordinair Products

If you are in the market for other hearth products, Fireplace Xtrordinair manufactures a full line of wood, gas and electric fireplaces and electric and wood burning fireplace inserts.

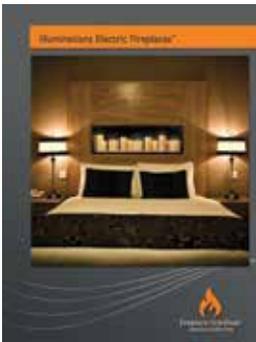

### Electric Fireplaces

The Fireplace Xtrordinair 564E and 21E Electric Fireplaces offer the convenience of adding a fireplace to any room within your home. With no venting required, installation can be completed in as little as one hour. They offer a selection of finish faces to match any home decor.

### Xtreme Gas Fireplaces

For the ultimate in design and fire style Fireplace Xtrordinair offers the Xtreme gas fireplace. Featuring a huge 60" wide by 20" tall glass fire viewing area and a collection of unique Fire Sculpture™ interior art.

### Illuminations™

The Illuminations™ Electric Fireplace is a breakthrough product designed to mimic the beauty of real burning candles. With a flick of a light switch or remote control, add ambiance and light without the mess or safety issues of candles. These fireplaces can be installed either single-sided or as a see-thru units.

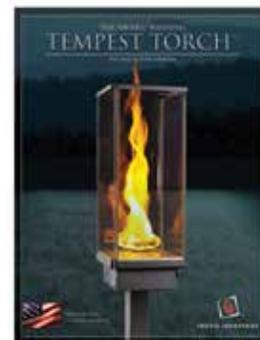

### Wood Burning Inserts

Fireplace Xtrordinair offers two flush to the fireplace wood burning inserts. The 33 Elite Plus and the Large Flush Wood Hybrid-Fyre™ inserts that feature a super clean burn, high efficiency and the revolutionary GreenStart™ automatic wood igniter.

### Gas Fireplaces

Fireplace Xtrordinair offers a complete line of heater rated gas fireplaces in both landscape and portrait-style designs. There are Fireplace Xtrordinair gas fireplaces in many sizes and for every heating need.

### Tempest Torch™

The Tempest Torch outdoor gas lamp is designed to create the ultimate in lighting enhancement. The patent pending Tempest Torch creates a natural venturi effect causing the flame to spiral and dance within the tempered glass walls without the use of electricity.
