Amantii Innovation

Achieve wow factor in any room with the BI-50-DEEP or BI-72-DEEP. These units are nearly double in depth of a traditional electric fireplace at 12". These models are designed for a truly no fuss, contemporary look. Select either the surround-less look (unit can be installed with finishing material flush to the glass) or install with a metal surround. Perfect for locations where running costly gas lines and venting are not possible.

Colourful Flames

The Built-in Deep series boast a stunning blue flame that is easily changed to purple or golden yellow with just a click of the remote. They feature the latest 'Dual Flame' technology for a truly dynamic and remarkably life-like flame.

Accessories - in the box

The Deep models come with large clear glass nuggets (3 for the 50" and 6 for the 72"), blue and clear diamond shaped media, a 6 piece decorative log set, a steel surround, and a remote control.

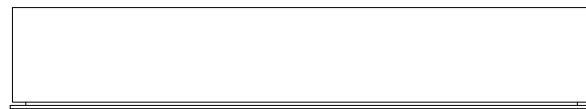

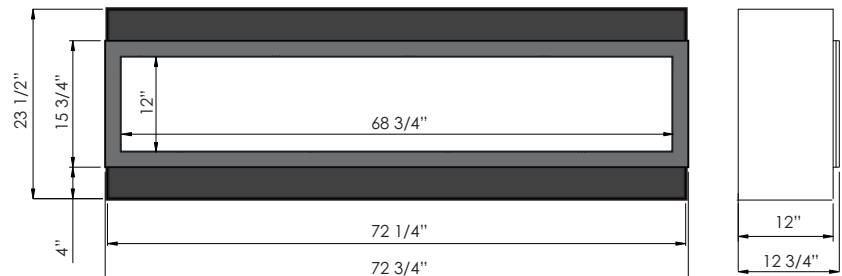

The steel surround comes standard in black but is also available as a custom order in any of the 34 Design Specialties powder coat finishes.

MSRP \$1599

MSRP \$1899
